

To make the Scribbler Dog bags basically do this: Print, fold in half on fold line, fold sides in toward “© Scribbler Dog” on the marked lines, tape sides shut, fill, fold top down and tape closed. This bag is very simple to make, however we do recommend reading the more detailed directions shown below.

These are more detailed step-by-step instructions:

1. Print, and then fold bag on the line marked number 1. Note that the bag might not fold exactly in the middle of the page depending on your printer settings; however it is recommended that you use the fold line.
2. Lay the bag so that “© by ScribblerDog.com or licensors. Terms see MomsBreakInc.com” is face up.
3. Fold the two lines marked number 2 inward. Tape or glue these side tabs.
4. Fill the bag with your bag fillers (i.e., dog treats, gift card, etc - see ideas section.).
5. Fold down remaining top flap (marked number 3) to close the bag. Tape or glue closed. Note that you may have to fold over the ends of both sides of the bag, depending on how the bag prints on your printer. Tape or glue the folded-over flap to close the bag.

Special Notes:

- * Remember when using glue to allow the glue time to dry between steps.
- * Printer types and settings do vary. These instructions should provide enough information for folding and closing the bag. However, it always best to do one test print and fold before printing several bags.

Enjoy
